

Blood Drive

Did you know a pint of blood saves three lives? On Monday April 27, Kimball high school had a blood drive. Mr. Medek, the one in charge of the whole blood drive program stated that about 85 students had volunteered to give blood, but 21 were turned down. Those who were turned down weren't able to donate blood because they found out information that didn't allow them to donate blood. At yesterday's blood drive, 61 units of blood was donated by those who volunteered. All the blood donated could save up to 183 lives. The blood donated is going towards people who are really ill or injured. Especially cancer patients.
