## Summer Plans

Summer is right around the corner once again! All the students look forward to those unforgettable sunny days. Everyone is going to try to make their summer plans unforgettable and fun. Making plans with your family or even your friends has been flowing through students minds each day we get closer to summer break.

The 100 degree weather is going to make you want to find a quick solution out. Four out of Four of all Kimball students questioned said going to the beach or, getting wet in any way possible, is a must-do this summer. This past year we are in a big water drought and it hasn't rained very much. So this means this summer is going to be very dry and scorching hot. "I really hyped for this summer because I'm going to Hawaii to visit family and it's nice to go somewhere far away from cow-town. But it really sucks because football for Kimball starts up in July and spending the rest of my summer at conditioning isn't the best." said, Joseph Rodriguez. "I'm not doing very much this summer besides my sporting events and maybe swimming in my backyard or even just hanging out with my friends" says, Jackie Barr. Not all plans consist of faraway vacations and fun and adventurous plans. Some plans are just really laid back and busied with their sporting events.

While preparing for the new school year, school sports are all over summer. Fall or year round sports such as football, volleyball, dance, and cheer teams are put into effect with at least once a week summer practices and camps. Dedication is important to our school and you can never be too prepared.
